25X1 Dershavin in writing his additional has been quite nimeral, and certainly has found some points that will take the notice and the eye of the onigre.

that he is "crasy" out all agree he is a very talented man, but nothing to speak of from the moral point of view. When you read his articles you get the impression that he is trying to latch on to something appealing to the US. In one article he refers to the US wealth - "it is their greatest force", and then he goes on to tell that they are wasting it on emigre organizations. He says that "Communism is now turning to the US". He attacks the KTS and develops the idea that there is a network of MTS operators and that "US money flows through these channels and goes to support a Communist fifth column. US financial aid being furnished to finance it — a net of Communist Agents to disrupt the work done manny the Soviet anti-Communists".
